

MUDPRO

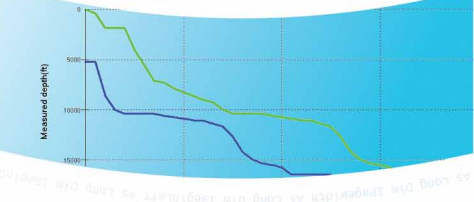

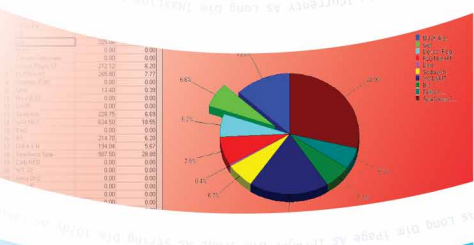

Drilling mud reporting

MUDPRO is the drilling mud reporting software designed to help mud engineers record mud data, calculate hydraulics, track inventory and create daily and end-of-well reports.

- Daily report and recap
- Hydraulics
- Well comparison
- Well data import and export
- Drilling interval setup
- Product database
- Concentration calculating
- Water-based, oil-based and synthetic-based mud
- Cost distribution (pie chart)
- Planned and actual data comparison
- Mud volume tracking
- Land and offshore wells
- Inventory carry-over
- Solid analysis
- Price change
- Supports oil field, SI and customized units

Flow rate (gpm)	Pressure (psi)	Temperature (°F)	...
100	150	120	...
110	160	130	...
120	170	140	...

Section (ft)	Length (ft)	Volume (bbl)	...
1	1000	1000	...
2	1000	1000	...
3	1000	1000	...

Section (ft)	Length (ft)	Velocity (ft/min)	...
1	1000	200	...
2	1000	200	...
3	1000	200	...
